

Medallion Homes Inc.

Medallion Homes knows the combination to standing above the new construction crowd: **Design/Function/Style.**

"Our homes are required to give first impressions for a lifetime," says Tom Jones, co-owner of Medallion Homes. "And they need to be easy and comfortable for a family to live in on a daily basis." He and partner Andy Maynor started the company in 1998.

When you first walk into a Medallion Home, you will notice the extensive trim work and crown molding. "Our goal is to never let people take the beauty of their home for granted. The ceilings, the trimwork, the accents will shine on a daily basis," explains Jones. All of this appears in an extremely well-engineered home that encompasses the finest construction practices.

"We're proud of the work it took to be designated a **REGISTERED HOME BUILDER**," says Jones. "We guard every step of the building process with our reputation." That reputation is best evidenced through Medallion Homes' longstanding relationships with its craftsmen. "Painters, roofers, electricians, bricklayers, framers—they all know the high level of workmanship we expect. And they know how to bring it to the jobsite everyday," says co-owner Andy Maynor, who worked as an electrical engineer before starting Medallion.

Having built homes in Forest Springs, Forest Springs North, Saratoga Springs, Stone Lakes, Saratoga Woods Estates and Rock Springs, Maynor and Jones experience consumer trends as soon as they happen. "Trying to eliminate high energy costs is an all-out effort right now," reveals Jones. "By implementing all the components of LG&E's **ENERGY STAR PROGRAM**, we are at the forefront of new construction trends."

"Being a custom builder who's on the job daily not only makes it easy to keep up with trends, but allows for quick customer service. "You don't have to maze your way through foreman and subs; you deal directly with the owners," says Jones. This way, Medallion Homes makes sure you get a great home that stands above the crowd.
